Are **you** a
passionate developer
that **believes** in
## software craftsmanship
?

If **so...**

FORTIGENT®

is **looking** for developers
like you

**We are always looking for top-notch software developers and testers.**

Fortigent is a Rockville, Maryland-based financial services firm offering specialized investment management, portfolio advisory and performance measurement services to our high net-worth individuals and advisor clients. We offer a developer-friendly agile development process, healthy work/life balance, respect for industry-accepted best practices, and an opportunity to express your ideas and demonstrate your excellence in a small team environment where your voice will be heard.
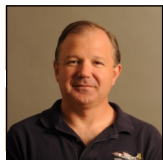

Meet your future coworkers:

Jamie McIntyre is co-founder and CTO at Fortigent. Jamie has championed building an industry leading wealth management technology platform. His interests include gaming, mud-dashing, and having other people write his bios.

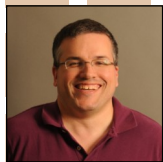

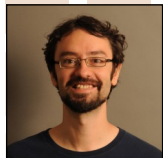

Guru Rao manages software engineering at Fortigent. His interests include agile software development, continuous integration/delivery, automated testing, and human capital management. His hobbies include biking with kids, camping and grilling.

Brett Green has been doing web development since Netscape Gold, and debating from the moment he left the womb. He has been in a love/hate relationship with CSS since 1999. Keep it Simple and Stupid!

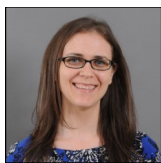

Dean Fiala has been writing software in two centuries, and tries to break at least one build a day just to stay in shape. He is a former Microsoft MVP and a co-founder/figurehead of the Rockville .NET Users Group (aka RockNUG).

Andriy Volkov has been around since CGA snow. He's got a degree in computers. He is a Continuous Improvement dude. Besides beating the CI drum, he likes sencha, LPs, backpacking, and meditation.

Tim Plourde is a veteran web developer with a penchant for interaction design. When he's not writing code you can find him playing ice hockey or enjoying the great outdoors.

Jennifer Alpert is an agile Business Analyst who also supports Technical Sales. She is a certified 200-hour vinyasa yoga instructor and spends her free time hiking, catching live music, doing headstands, and drinking kale juice.
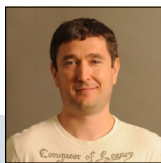

Jimmy Bosse has been working with .NET and C# since 2001. Jimmy became a TDD fanatic in 2005. He loves writing code, watching sci-fi, and riding his electric skateboard. Red Green Refactor!
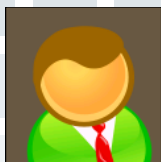

Robert Lewicki is the Enterprise Architect at Fortigent. Annoying the engineering team with restrictions, and constraints, he is ruminating about design constraints of building microcontroller based hardware. Robert's enjoyment is piloting small aircraft.

Jagan Mohan has a over a decade of experience in Microsoft technologies. Jagan is always a learner. Jagan likes Fortigent's passionate team.

Andriy Podlyesnyy leads the offshore development team. His focus is Middle and Database tiers while he also writes frontend because he must. He squeezes in bleeding edge technologies everywhere. A champion of TDD at Fortigent. He likes autocrossing and hiking.

Amir Mafinejad is a Sr. Project Manager at Fortigent with more than fifteen years of progressive experience in project and product management, software development, and system integration.

Ravi Radhakrishnan has been working with Software Quality Assurance for over 2 decades. During weekends he spends time running a non-profit org with a team dedicated to spreading devotional songs from all parts of India and raising funds for Charity.

Dayakar Mareddy is a Sr.Test Engineer at Fortigent. His Interests include Test Automation, Open source tools and Database testing. Daya enjoys playing cricket, tennis and loves traveling.
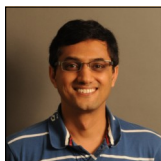

Joseph Konrad started at Marine Midland Bank (extinct) as a trust assistant. From there he worked in portfolio accounting, performance measurement, trading and operations management before joining Fortigent as a business analyst.
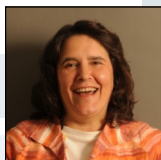

Geoff Snowman's interests include web development and cloud computing. Previously, Geoff worked for Microsoft where he became infamous as "the MSDN seminar guy." Geoff is a frequent speaker at conferences and user groups throughout the Mid-Atlantic area.

Chetan Dalsaniya started his career as a System Analyst in the Finance Industry. Later, he completed his MBA (Finance) from St Joseph's University and is currently serving Fortigent as a Sr. Business Analyst. He believes in making things better and in making better things.
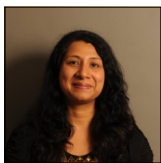

Ramachandra Chanapatna has more than a decade of development and team lead experience. He loves exploring into Open Source world and plucking out the good stuff and pasting into his project. He is a cricket and football lover. Go REDSKINS!!

Jan Corsetty is a Senior Database Administrator at Fortigent. Her specialties are MS SQL Server administration and performance tuning. Her hobbies include travel and scuba diving.

Mark Sappington is a Data Architect at Fortigent. He enjoys music, the outdoors, and spending time with his three sons.

Ranjini Prabhakar Works with .NET, C# and SQL Server. Her kids are the center of her world and she loves traveling.

Pushpak Laddha started his career with C,C++ creating proxy servers before moving on to .NET, development, which he has been doing for over 10 years. In his spare time he enjoys playing tennis, badminton, ping pong, and chess, and poker.
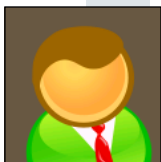

Zach Girod started writing software when he got his first TI-82 graphing calculator. His hobbies include U.S. history, astronomy and running.

Elizabeth Pedalino manages technical support activities at Fortigent. She coordinates feedback from users to increase the quality and service of all our applications. In a sense, she keep things flowing. She enjoys the outdoors, scuba diving and traveling.

Sarada Aragonda started working as a Java developer and moved to testing with 9+ years experience. Interests include Automation, whitebox & CRM app testing. Her passion is to filter out bugs to produce high quality software. She loves spending time with her kids.
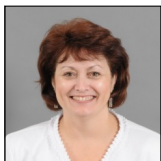

Abhishek Sharma is Sr. Engineer at Fortigent. He believes in smart solutions.

Chakradhara Penumarthi has more than a decade of experience in quality assurance, expertise in manual testing, automation testing and project management. In his leisure time he enjoys time with his kids, playing the digital key board, classical music, and cooking.

Warren Breslyn is the Fortigent IT Manager with over 14 years IT experience. You break it, he fixes it and removes permissions so you cannot break it again. He enjoys the great outdoors with his children, family, and friends.

Sheila Dugan has Twenty years of Technical Project Management experience.

Daniel Kempner is a software developer at Fortigent and a recent graduate of University of Maryland. In his spare time he enjoys tinkering with new gadgets, fiddling with a guitar, or exploring the cosmos from the comfort of his computer screen.

Timothy Kang is a software developer at Fortigent. He has a BS in computer science and a BA in economics from the University of Maryland, College Park.
